Notes: Estimate = share choosing BC (HC1-robust SE in parentheses). *** p<0.01, ** p<0.05, * p<0.1 (FDR-adjusted). One-sided test direction per pre-registration: H5–H9 (BI/BG/BN/BC_SD/BCmat) test H1: share > 0.5 (BC preferred); H10–H11 (BCflight/BCbeef) test H1: share < 0.5 (the alternative scenario is preferred). † = significant (two-sided, unadjusted p<0.1) in the direction OPPOSITE the pre-registered hypothesis - a real effect, just not the one predicted. R2 is 0 by construction (intercept-only models).
